

Virtustream Healthcare Cloud for EHR

1. PERSONAL WELLNESS PRESCRIPTION

Your doctor emphasizes wellness and recommends that you:

Make your health a priority. You deserve it!

Adopt good habits like exercise and a full night's sleep.

Establish optimal baselines like weight, blood pressure and more. Set goals for the future.

Work with clinicians and specialists to prevent disease and manage chronic conditions.

2. YOUR EHR WELLNESS PROGRAM

Virtustream recommends an **EHR Wellness Program** to ensure optimal results during transformation to digital care delivery.

Make your EHR solution a priority

Your Healthcare Delivery Organization (HDO) deserves it! EHR is essential to establishing management and core to transformative initiatives like population health and real time health services.

Define good EHR habits

Make sure your HDO develops good habits when managing data, implementing risk mitigation procedures, providing a continuous review of security policies and enforcement, and documenting compliance with HIPAA and HITRUST requirements.

Know your EHR baseline

Understand your infrastructure consumption and costs today and estimate the cost required to stay current with on-premises EHR implementation. Inventory custom code written for integration and interoperability and determine how to improve. Document application security performance as it is today and establish your organization to have future success.

Work with specialists

Take advantage of our expertise! We specialize in managing extreme applications. Only Virtustream combines purpose-built hardware, management platform and consumption-based billing to provide the most responsive, extensible, resilient healthcare cloud for EHR customers.

Ongoing wellness

Once your EHR implementation moves to Virtustream we fill the resource gap – supporting your EHR in the Virtustream Healthcare Cloud. Your EHR in our cloud with less risk and unexpected costs.

3. YOUR PRESCRIPTION: VIRTUSTREAM HEALTHCARE CLOUD

Storage, compute and networking designed for aggressive workloads.

The ultimate hybrid cloud experience: dedicated kit connects to multi-tenant infrastructure and other Virtustream cloud services.

Unified control pane presents application automation, infrastructure orchestration, business intelligence and service delivery.

Usage analytics drives intelligent workload placement, eliminating costly overprovisioning; Virtustream's MicroVM is the most economical cloud billing unit.

Comprehensive risk and compliance management tools that manage the entire risk and compliance lifecycle all the way to audit package preparation.
