## xStreamCare Services™ for Google Cloud

From planning to execution, Virtustream's xStreamCare Services modernize SAP implementations and streamline your S/4HANA migration to Google Cloud. Personalized, attentive service from your designated customer success expert delivers a single point of accountability for your S/4HANA deployment. By relying on Virtustream for your Google Cloud SAP application management, your IT staff can focus on innovating.

- **Unified billing** with Virtustream as your single point of accountability
- **Enterprise-class reference architecture** aligned to Virtustream, SAP and Google Cloud best practices
- **Global private fiber** that delivers low-latency network performance

## Migrate, Operate and Transform SAP on Google Cloud

Virtustream supports the full cloud lifecycle from migration to monitoring, management and operational support. Continually optimize your environment with comprehensive technology and security services that evolve with your business. Integrated services delivery and billing across the full stack simplifies administration and budgeting.

## Virtustream's Solution Benefits

Reduce operating costs, improve service levels and efficiently maintain application portfolios with:

- **Faster time to cloud** utilizing Virtustream's build automation, reducing build times from weeks to hours
- **Reduced risk** through integrated security controls that protect mission-critical applications and data
- **Efficient operations** by offloading management to Virtustream's SAP-certified professionals
- **Improved agility** from a single, integrated model that adapts and scales quickly

## Virtustream and Google: Better Together

Together, Virtustream and Google deliver a complete solution for SAP on Google Cloud including:

- **Flexibility to scale** virtual machines without a restart
- **Cost control** with per-second billing and machine learning rightsizing recommendations
