

DATA SHEET

# xStreamCare Services™ for Security and Compliance

Proactive security powered by  
the Trust Platform

Overcome complexity, lack of actionable visibility, and cybersecurity skills gap by leveraging more than ten years of Virtustream experience in securing regulated, mission-critical workloads. xStreamCare Services for Security and Compliance empower you to proactively detect, prevent and respond to threats by bringing together near-real-time visibility and industry-leading security tools.

With the growing volume and sophistication of cyberattacks, a lack of timely and actionable visibility puts your organization at risk. Also, increased cybersecurity complexity and an unprecedented shortage of security professionals limit the ability to stop potential threats from becoming a breach.

xStreamCare Services for Security and Compliance – trusted by enterprises and healthcare organizations to secure mission-critical workloads in the cloud – help you establish a proactive security posture. This suite of cybersecurity services protects your vital applications and data hosted in the Virtustream Enterprise or Healthcare Cloud, along with near-real-time visibility into threats and security alerts, powered by the Virtustream Trust Platform.

## Key Benefits

**Gain Actionable Visibility:** Proactively manage security risks with a near-real-time, contextual views across vulnerabilities, intrusion attempts, and other security alerts..

**Achieve In-Depth Protection:** Gain comprehensive security coverage across the network, host, operating system (OS), data, and application using industry-leading tools and technologies, backed by more than 10 years of experience securing and enabling compliance for regulated, mission-critical cloud workloads such as SAP, healthcare, and government application.

**Improve Productivity and Fill Skills Gap:** Offload cloud security management to reduce the security operations burden on in-house staff or meet security skill demands.

**Experience One-hand-to-shake Simplicity:** Eliminate the complexity of dealing with multiple vendors, training existing staff, and selecting, procuring, architecting, deploying, and maintaining a complex security ecosystem for your mission-critical cloud workloads. Virtustream deploys and manages pre-selected security tools, including software subscriptions.

## xStreamCare Services for Security and Compliance Offering

Available as Essentials, Enhanced and Healthcare security bundles, each bundle includes:

**Security Management and Alerting:** Select from security services that align to your workload sensitivity and business criticality. Services include subscription, deployment, and management of pre-selected security tools and software. See Table 1 for details.

**Access to the Trust Platform:** The Virtustream Trust Platform prompts proactive action by providing near-real-time, contextual visibility into your security posture.

## The Trust Platform

The Trust Platform is a state-of-the-art, intuitive, and simple-to-use set of security dashboards that prompts proactive action with near-real-time, contextual visibility into your security posture. Key functionality includes:

**Alerts Dashboard:** Displays security alerts with sensitivity levels that originate from Virtustream-deployed security controls with the ability to drill down, filter, and data export. .

**Vulnerability Dashboard:** Prompts proactive action through awareness of open vulnerabilities as well as their severity and age. Authorized users define and manage aging and remediation policies.

**Log Management Dashboard:** Enables ad-hoc queries against aggregated security and OS logs.

**Compliance Reporting:** Allows on-demand download of available reports such as Type 2 SOC 2 + HITRUST with Cloud Security Alliance (CSA) Cloud Controls Matrix and Type 2 Attestation (AT-C 105 and AT-C 205) HIPAA/HITECH.

**Asset Management Dashboard:** Catalogs all assets in the cloud along with the status of security services.
